

16"x4" 5 Bolt 5-1/2" Bolt Circle
Steel Disc Style Motor Vehicle
Wheel - Riveted Constructon with
4 Internal "Bumps" for Hubcap
Retention. 3-3/8" Center Hole

This is thw wheel manufacurer's
logo stamped into the inner surface
of the rim adjacent to the tube stem
hole.

I can find NO 16x4 5@5½ wheels in
any of my Hollander's Interchange
manuals from the 1930's thru 1968.

This wheel ca me from a Jeep rear axle
(center hole is too small for 4WD
frnt hub, with a Goodyear Surbanite
snow tire from the 1950-1960 era.
